OF BANGLADESH**

**Standard Request for Application (SRFA)
Selection of Individual Consultant (National)**

(Time Based)

Guidance Notes on the Use of the Standard Request for Application for Selection of Individual Consultants (National)

These guidance notes have been prepared by the CPTU to assist a Client in the preparation, using the Standard Request for Application (SRFA), for procurement of Individual Consultants (National). The Client should also refer to the Public Procurement Act 2006 (Act No 24 of 2006), and the Public Procurement Rules 2008, issued to supplement the Act available on CPTU's website: www.cptu.gov.bd/. All concerned are advised to refer to the aforementioned Act and Rules while participating in any selection process of Consultants.

Individual Consultants shall be employed in accordance with Section 38 of the Public Procurement Act 2006 and Rule 112 & Rule 104(d) of the Public Procurement Rule 2008 for assignments for which the qualifications and experience of the individual are the overriding requirements and no team of staff and no additional professional support are required.

This document shall be used when a Procuring Entity (the Client) wishes to select an Individual Consultant (National) for **assignments for which the qualifications and experience of the individual are the overriding requirement**, for which remuneration is being determined on the basis of the time actually spent by the Consultant in carrying out the services.

Time-based Contracts are recommended when the Scope of the Services cannot be established with sufficient precision, or the duration and quantity of Services depends on variables that are beyond the control of the Consultant, or the output required of the consultants is difficult to assess.

Consultant's remuneration is based on (i) agreed unit rates for the Consultant multiplied by the actual time spent by him/her in executing the assignment, and (ii) reimbursable expenses using actual expenses and/or agreed unit prices. This type of Contract requires the Client to closely supervise consultants and to be involved in the daily execution of the assignment.

SRFA (PS4) has been designed to suit the particular needs of procurement within Bangladesh, and has four (4) Sections, of which **Section 1: Information to the Applicants and the Contract Agreement in Section 4 must not be altered or modified under any circumstances.**

The Client addresses its specific needs through the **Section 2: Terms of Reference (TOR)**. The way in which an Applicant expresses his/her interest is by completion and submission of the Application Forms in **Section 3**.

Guidance notes in brackets and italics are provided for both the Client and the Applicants and as such the Client should carefully decide what notes need to remain and what other guidance notes might be required to assist the Applicant in preparing its Application submission; so as to minimize the inept Selection process.

SRFA (PS4), when properly completed will provide all the information that an Individual Consultant (National) needs in order to prepare and submit an Application. This should provide a sound basis on which the Client can fairly, transparently and accurately carry out an evaluation process on the application submitted by the Individual Consultant.

SRFA(PS4) duly tailored may also be used for the purpose of Single Source Selection Method.

The following briefly describes the Section of SRFA (PS4) and how a Client should use these when preparing a particular request for Applications.

Section 1: Information to the Applicants

This Section provides relevant information to help Consultants prepare their Applications. Information is also provided for submission, opening, and evaluation of Applications and on the award of Contract.

This Section also contains the criteria for selection of suitable Applicant
The text of the clauses in this section shall not be modified.

Section 2. Terms of Reference

This section defines clearly the Objectives, Goals, and Scope of the assignment, and provides background information (including a list of existing relevant studies and basic data) to enable the Individual Consultant to clearly understand the assignment. This section lists the Services and surveys that may be necessary to carry out the assignment and the expected outputs (for example, reports, data, maps, surveys); it also clearly defines the Client's and Consultants' respective responsibilities.

Section 3. Application Forms

This section provides the standard format that permits the requested information to be presented in a clear, precise and readily available manner and allows the Client to readily understand and evaluate Applications in accordance with the pre-disclosed criteria. The completed forms will indicate details of the Applicant's qualifications and experience best suited to the specific assignment.

Section 4. Contract Agreement Forms

The Form of Contract Agreement which, once completed and signed by the Client and the Consultant clearly defines the Client's and Consultants' respective responsibilities. The Annexes to the formal Contract include a Description of the Services, the Reporting Schedule and **Cost estimates** of Services.

BACKGROUND AND GENERAL DESCRIPTION

Gene bank refers to any system by which genetic resources are identified and conserved. There are rich biodiversity of plant, animal, fisheries, invertebrates, microbes, etc. in Bangladesh. Gradually, a numbers of species become extinct because the pressure of population growth. Once those species become extinct, their gene pools are lost forever. Germplasm is the hereditary message which dictates the development of plant, animal, fisheries, microbes, etc. This biological information is passed from generation to generation in an unbroken chain of living cells. Unlike other resources, one cell is lost, the germplasm is lost. Therefore for all practical purposes it is stored only in living systems. The organisms of no apparent immediate usefulness but which are parts of the web of life. Germplasm is best held in natural systems or entire biomes.

The collection of germplasm serves as insurance against genetic erosion and as a source of resistance to diseases and pests, tolerance to climatic and other environmental stresses and improved quality and yield traits for improvement. Thus it is essential to collect and conserve such valuable resources of plant, animal, fisheries, invertebrates and microbial wealth to be managed scientifically with high priority. In Bangladesh genetic resources of plant, animal, fisheries, microbes, etc. have been preserved by various research (Bangladesh Agricultural Research Institute- BARI, Bangladesh Rice Research Institute- BRRI, Bangladesh Livestock Research Institute- BLRI, Bangladesh Fisheries Research Institute- BFRI, Bangladesh Institute of Nuclear Agriculture- BINA, Bangladesh Jute Research Institute- BJRI, Bangladesh Sugar Crop Research Institute- BSRI, Bangladesh Wheat Research Institute- BWRI, Bangladesh Forest Research Institute- BFRI, Bangladesh Sericulture Research and Training Institute- BSRTI, etc.) and academic organizations, by individual farmer/personnel and by various private organizations. However, we lost many of our diversity and some species are now in danger. Hence it is necessary to establish a National Gene Bank for preservation of genetic resources of the country centrally. Besides, development of information and database about genetic resources with the assessment of biodiversity is also important. This will create opportunity to play role in socio-economic development of the country by providing genetic resources and relevant information to the researcher and relevant people involved in R&D. Conserving genetic resources of plants and animals at national level will facilitate to keep balance of eco-system as well as to meet the future challenges of human needs of different diversity.

In a meeting of "National Executive Committee on Biotechnology (NECB)" presided over by Principal Secretary of Prime Minister's office on 29 January 2012, decision was made to establish "National Gene Bank". Later in 2nd meeting of "National Taskforce on Biotechnology of Bangladesh (NTBB)" presided over by the Honorable Prime Minister was held on 26 April 2012 decision was taken to establish Gene Bank. In the same meeting it was decided that National Institute of Biotechnology (NIB) will take all initiatives to establish national gene bank. According to the decision of NTBB 2nd meeting NIB is implementing the national gene bank project. The goal of the project is to conserve and explore natural biodiversity for sustainable technology development through R&D program, food security, livelihood improvement and economic development of the country. The specific objectives of the project are- **(i)** Establishment of physical infrastructure of the national gene bank necessary for the conservation of plant, animal, fisheries, microbial, insect, invertebrates, forest & human genetic resources centrally; **(ii)** Development of laboratory facilities

for the characterization of various genetic resources and (iii) Development of policy document and approval by the competent authority to obtain genetic resources from other gene banks/genetic resources centers existing in the country.
